SUMMARY

DevOps Engineer with nearly 3 years of experience building and running cloud infrastructure for a 60+ microservice platform at Park+, growing from intern to SDE 2. Works across AWS, Azure, and GCP with Kubernetes, Terraform, CI/CD, and observability, and builds AI tooling that makes operations faster and safer. AWS Certified Solutions Architect – Associate and Terraform Associate; M.S. Computer Engineering at ASU (4.0 GPA, Dec 2026).

TECHNICAL SKILLS

Cloud & Containers: AWS, Azure, GCP; Kubernetes (EKS, AKS, GKE), Docker, Helm
IaC & CI/CD: Terraform, Ansible, CloudFormation; GitHub Actions, GitLab CI, Jenkins, Azure DevOps, Argo CD
Observability: Prometheus, Grafana, OpenTelemetry, Datadog, ELK, PagerDuty
Languages & Data: Python, Go, Bash, SQL; PostgreSQL, MongoDB, Redis, Kafka
AI: LLMs, RAG, AI agents, MCP, LangChain; Claude Code, GitHub Copilot
Security: HashiCorp Vault, least-privilege IAM, Trivy, Snyk; SOC-1/SOC-2

PROFESSIONAL EXPERIENCE

Park+ (Parvion Technologies Pvt. Ltd.), SDE Intern → SDE 1 → SDE 2 (DevOps) *Gurugram, India | Mar 2022 – Jul 2024*

- Built and operated cloud infrastructure for a **60+ microservice** platform running **100+ pods** on Kubernetes.
- Automated **95%** of environment provisioning with Terraform and Ansible, cutting setup from days to **under 45 minutes**.
- Built observability with Prometheus, Grafana, and ELK, cutting mean time to detect **30%** and to resolve **40%**.
- Right-sized resources to cut infrastructure costs **30%** and improve performance **25%**.
- Moved **400+** credentials into HashiCorp Vault and remediated **98% of high-severity findings** for SOC-1/SOC-2.

Winjit Technologies, Software Developer Intern *Nashik, India | Oct 2021 – Feb 2022*

- Migrated a client's on-premises infrastructure to Kubernetes on Azure, redesigning the deployment pipeline to cut deployment time **20%**.

PROJECTS

- **Custom MCP Server with Claude Code:** Built a Python Model Context Protocol server that connects AI assistants to internal tools, docs, and runbooks, cutting repetitive engineering tasks **~30%**.
- **Kubernetes AI Troubleshooting Agent:** Built an agent that reads cluster state, logs, and alerts, diagnoses issues, and proposes fixes, validating every action before it runs, cutting manual triage time **~40%**.
- **AI Observability Platform:** Built metrics, tracing, dashboards, and alerting for AI workloads with Prometheus, Grafana, and OpenTelemetry, improving issue detection time **~35%**.
- **RAG Pipeline:** Built a retrieval-augmented generation pipeline in Python and evaluated it against a test set, improving answer relevance **~25%**.
- **Local LLM Deployment:** Deployed and tuned a local LLM in Docker on GPU hardware, reaching sub-200ms response times.
- **LLM-Powered MongoDB Query Tool:** Built a tool that turns plain-English questions into MongoDB queries, with checks that block unsafe operations, so non-technical teams can pull their own data.

EDUCATION

M.S., Computer Engineering, Arizona State University, Tempe, AZ *Aug 2024 – Dec 2026*
GPA: **4.0**. Coursework: Algorithms, Data Processing at Scale, Artificial Intelligence, Computer Architecture 2

B.E., Electronics and Communication Engineering, National Institute of Technology, Delhi *Aug 2022*

CERTIFICATIONS

AWS Certified Solutions Architect – Associate | **HashiCorp Certified: Terraform Associate** | AWS Certified Cloud Practitioner | Istio Fundamentals
